Commercial EV charging

If you install EV charging points in commercial locations Rapid can support you through our EV expert partner status with EO. By combining EO's charging range with the eoHUB, a fully flexible and highly scalable turnkey solution can be built around an organisation's specific needs. Installers will also be able to offer businesses account management, tailored support services, capital purchase and lease options. Find out more about how to make Rapid your EV charging partner: www.rapidonline.com/evcharging.

You get the benefits of buying EV charging products through a distributor. These include:

- Credit accounts: with instant 60-day payment terms
- Buy online, 24 hours a day, with full parcel tracking
- Same day despatch on all orders before 7pm
- Fast delivery times on all in-stock items
- Forward/Schedule order service to ensure stock availability of your most ordered products

EO do not just make plugs for electric cars – they build smart energy technologies. Designed and manufactured in the UK, EO's charging points are for homes, workplaces and destinations. The eoHUB, a revolutionary smart energy device that links to EO's Genius Charger, puts up to 30 chargers online, unlocking EO's software capabilities and making installing multiple smart chargers incredibly cost effective.

Rapid have 'EV Expert partner' status with EO.

- EO products are quick and easy to install
- Designed and manufactured in the UK
- Competitive pricing
- Free replacement of any broken chargers up to 3 years after purchase
- Trained partner network providing installers with sales and marketing materials and support

EO Products

EO like to keep things simple.
There is essentially two products,
with a number of different options.

1.EO GENIUS

The Genius charger becomes super smart when connected to an eoHUB. Monitor your energy usage via eoCloud and control your charger from your smartphone. The Genius is a future proof, smart-ready charging station. When connected to eoHUB, EO's software platform (eoCloud) and smartphone app (eoApp) are unlocked. eoHUB is a smart-energy device which can put up to 30 Genius chargers online and in real-time, manage the electricity supply. Because of the additional connectivity features of the Genius, installers need to attend the eo academy advance installer training as well as the NICEIC EV charging course or City&Guilds EV charging course (2919) qualification to install the eo Genius.

2.EO MINI

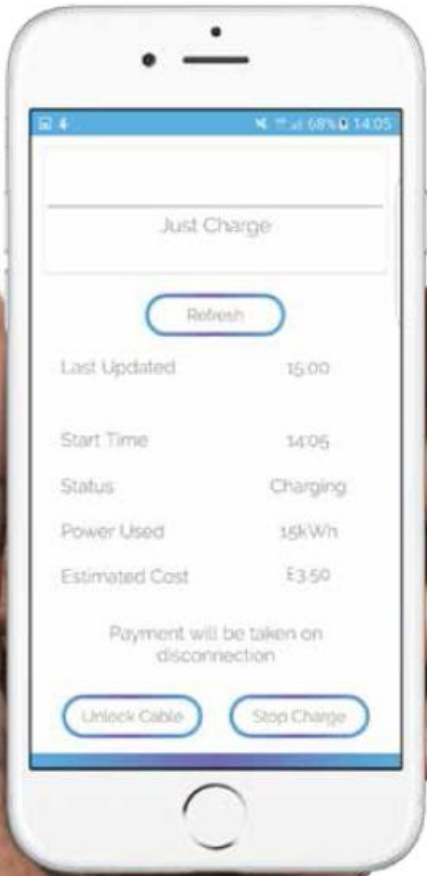

The eoMini is the UK's smallest and most discrete fast charger. With no software, the eoMini is a super cost-effective charging solution for no nonsense charging at approx. 30 miles charge per hour. Installers need to have NICEIC EV charging course or City&Guilds EV charging (2919) course qualification to get permission to install eoMini.

EO HUB

eoHUB is a little internet connected box that plugs into a Genius charger and puts it online. One eoHUB can connect up to 30 Genius chargers, making installing multiple smart chargers super cost effective. eoHUB allows you to control your Genius chargers via eoCloud and eoAPP.

- For maximum safety eoHUB monitors a building's power supply and actively manages the load on multiple chargers
- Hard-wire internet connection only for reliability and low-cost ongoing fees

EO SMARTPHONE APP

Control your charger from anywhere in the world. Start, stop and pay-for-charge – all from the palm of your hand

- Navigate to your nearest available EO
- Pay for charging on-the-go
- View your charging history
- Charge session notifications

EO CLOUD

- Monitor your energy usage
- Link to your work account for your employer's benefit
- Track your usage on-the-go
- Make your charger publicly available and generate revenue

Multi Dwelling Installation

HOW IT WORKS

Future proof and scalable charging solutions for your business

eoHUB is a mini-computer. It can receive new software features over-the-air.

One eoHUB can put up to 30 Genius charging stations online.

INTELLIGENT ENERGY

Aside from being EO's secret weapon when it comes to cost-effective smart charging, eoHUB is getting smarter. In the near future it will intergrate with the smart-grid, solar PV and battery storage: enabling you to generate revenue from grid-services and reduce (potentially remove) the requirement for upgrading your power supply.

eoHUB monitors the power usage of your building in real-time and turns up and down the chargers based on the energy available. We call this Dynamic Load Balancing.

Become an EO Installer

Are you an installation company looking to enter the EV market? Or wish to add EO products to your existing EV portfolio? Rapid & EO have designed the UK's unique partner programme; designed to help you grow your business. Drop us an email at evcharging@rapidonline.com for more information on **free installer training days**, where you will learn about EO products, industry best practice on installation techniques and product installation requirements.
